CLOSED ITS DOORS.

The Florence National Bank of Florence, Ala.—The Alleged Cause.

BIRMINGHAM, Ala., June 22.—The Florence National Bank of Florence, Ala., closed its doors to-day. The immediate cause is attributed to the spread of false reports which caused a run on the bank. Some confusion seems to have been caused by reason of Plamian, cashier of the Alabama banking and trust company, having been for a time president of the Florence national bank. His books showed \$140,000 deposited in the Trust's National bank of Boston, but a draft on that bank for \$9000 went to protest. It developed that \$10,000 had been appropriated to paying certificates of deposit of the Alabama banking and trust company on an order of Plamian.

New York Life Insurance Investigation

New York, June 22.—Michael Scammon, deputy superintendent of the state insurance department, and John S. Patterson, the attorney of the department, began an examination of the affairs of the New York life insurance company this morning. Dr. Tuck, vice-president, could not tell how long the examination would take, but it would certainly occupy a good deal of time. Mrs. Scammon, president of the company, will sail for New York Wednesday the 24th. Tuck contradicted the report that the officers of the company had endeavored to induce the superintendent of the state insurance department to postpone the investigation of the company's affairs until his return from Europe.

THE MISSOURI RAGING.

HIGHER THAN HAS BEEN KNOWN FOR SEVERAL YEARS.

Cutting Land on the Kansas Side at a Fearful Rate—Some Well Grounded Predictions.

ST. JOSEPH, Mo., June 22.—The Missouri river is higher than for several years, and is still rising. All government work on the Kansas shore has been abandoned and the government fleet moved to a place of safety. The rapidity with which the waters are cutting away the Kansas bank can be best imagined when it is stated that half-acre jobs of earth have been tumbled into the river since yesterday. Workmen who came in from Belmont on the government steamer this morning state that the neck of land which now separates the river north and south is less than a quarter of a mile wide. At the rate the river is cutting the land away it would require but a short time to place Elwood suburbs on an island and leave St. Joseph two miles from the river. This would also leave St. Joseph's million-dollar bridge standing over a dry spot, where the river would flow. Several farmers have lost hundreds of dollars in wheat and corn.

KANSAS CITY IN THE SWIM.

KANSAS CITY, Mo., June 22.—The flood in the Missouri river reached the city last night, and water now stands two and one-third feet above the low water mark. An additional rise of two feet would flood the low lands along the river and cause great loss to property. The rise in the Missouri has backed up the waters of the Kaw until they stand within two feet of flood tide.

DENONCED MASONRY.

A Few Scathing Remarks From a Minister Causes a Commotion—A Mason Has His Say, and Leaves the House.

BOSTON, Mass., June 22.—During the regular meeting of Baptist ministers in Chapel hall this afternoon Rev. J. B. Stoddard addressed the conference, and his suggestion, upon the influence of secret societies upon churches, and in the course of his remarks strongly denounced Masonry, declaring that no man swears allegiance to a secret society, and a code of antagonism to God.

Rev. Mr. Cleveland of Melrose, who was in the audience, arose to a point of order and, with suppressed emotion, said: "I am a Mason, and have listened to this scathing denunciation of the order in patience, but I cannot listen to this unjust and untrue statement of the order."

Chairman Morris put the question to the meeting on sustaining the point of order and it was defeated 50 to 7. Instantly Cleveland arose and addressed the secretary as follows: "I request that you drop my name from the roll of membership of this conference. I do not care to be a member of any body that refuses to sustain a doctrine so grossly untrue as that the order is a secret society, and that it is a code of antagonism to God."

He then turned to the roll of membership and he left the hall and Stoddard finished his address.

STEELE MACKAYE'S TABLE.

He Had Some Difficulty in Getting the Aged Carpenter to Make It.

Steele Mackaye, the dramatist, can do a good story as well as write a good play. At Wormley's he was relating some of his experiences in the little village of Concord, N. O., where he spent some time.

"I wanted a table made," he began, "and was directed to the village carpenter. He was an aged man, and when I finally found him he was leisurely engaged in the manufacture of a coffin. It looked as if he had been at work upon the coffin for a week. I asked him if he could make me a table. He allowed that he could when he 'got at it.' And when will you get at it?" I asked. Suddenly he parried my direct question with another. "What kind of a table do you want?" he asked me, with the air of a man who has got the enemy cornered.

"I described the table, and the old man again fell into deep thought. At last, when I showed some impatience, he told me to come again next week."

"A week later I reminded him about my table. Yes, he remembered it, and a conversation, but he really did not think he could go to work upon it until he had seen some of his relatives. He did not exactly know whom he had to see, nor where they lived, but he was positive that they had to be seen before my table could be begun. Besides this he hadn't any lumber."

"Where can I get the lumber?" I asked in desperation. Well, he thought it could be obtained at the mill. And where was the mill? Twelve miles away. So I mounted my horse and started for the mill. I found it after a long search. It was a dilapidated affair, and the saw was half way through a log. But the saw was rusty, a sign that it had not been in use for a week. A woman came out of a house nearby and answered my shouts. I told her that I wanted to see the owner of the mill.

"What do you want to see him for?" she drawled. I told her about the lumber which I needed, and her husband came out. He was a long, lean, back-fallen man, and was sucking a yam. It was the funniest sight you ever saw. All during his conversation he sucked this yam and spoke in slow, deliberate sentences. He finally concluded that he did not care to take the trouble to cut the lumber, and I rode twelve miles back to town."

"And did you ever get the table?" he asked.

"Down by the railroad was a factory," said Mr. Mackaye. "Nobody in the town had mentioned it, although fifty people had told me of theaged and work deferring carpenter. I found the factory by accident, gave my order for the table, and had it made in less than twenty-four hours.—Washington Post.

A Yankee "Swapper."

A New London expressman is about as good a specimen of Connecticut Yankee as has recently come to light. He recently ran across a useless old barrel which he didn't want, and so he traded it with a colored man for a watch. He then sold the watch to a man for \$9.50, to be paid in installments. He got four dollars of it, when the man went "broke," couldn't pay any more and gave up the watch. The cunning wretch then couldn't pay the full amount he would forfeit, who was already paid, so the expressman had the watch and the four dollars. In a little while a man came along who owned a sully hat he didn't want, and who was glad to trade it off for the watch. The expressman accommodated him, and considers it the best trade he ever made. At this rate of progress it won't be long before that sully will be worked by easy stages into a house and lot.—New London (Conn.) Telegraph.

NOT ARBITRATORS.

The Behring Sea Controversy Has Not Progressed Far Enough for That.

WASHINGTON, June 22.—The department of state has been notified that the British government has appointed Sir George Baden Powell and Mr. W. Dawson, agents for that government to visit Alaska and collect information respecting the seal fisheries. The statement coming from London that these men have been appointed arbitrators is erroneous. Negotiations looking to arbitration of the claims made by the United States to jurisdiction over Behring sea have not yet progressed to a point that would permit of the appointment

CHARMS OF ARCTICS.

THE FASCINATIONS OF THE FROZEN REGIONS.

Four Expeditions Now En Route for the North Pole and One for the South Pole—Previous Attempts.

IT is not easy to explain in a popular article why any one should be eager to reach either pole of the earth except as a matter of mere curiosity, but navigators have been trying it at frequent intervals for nearly four centuries, and this summer five expeditions will start—four for the north pole and one for the south. It is some slight satisfaction, however, to learn that there has been a steady gain, though a very slow one, and that in 1882 two men reached a point within less than 400 miles from the north pole to wit, latitude 83 degs. 24' min.

We may name Sebastian Cabot as the pioneer, and his object and that of his successors for over three centuries was to find the northwest or northeast route to Asia. Within the sixteenth century Frobenius, Davis, Willoughby, Chancellor, Barentz and others searched long for the wanted passage, and early in the last century Captain Henry Hudson sacrificed his life by persistence in the attempt. Early in the eighteenth century the maritime nations vied with each other in daring attempts upon the north. Behring became famous by his discoveries, and Vancouver surveyed the whole north-west coast of America. Captain Parry and Lyon became famous early in this century, and then all interest centered in Sir John Franklin.

In 1855 a company was formed in London called the "Fellowship for the Discovery of the Northwest Passage," and from 1743 to 1816 parliament offered £20,000 for this discovery. Later a reward of £5,000 was guaranteed to any one who should pass 110 degs. westward; later changed to 130, and lastly to 120 degs. Captain Parry received one of these rewards. Sir John Franklin did discover a northwest passage, such as it was, for he sailed down Peel strait and Victoria strait, since called Behring sea. He died, as was afterward discovered, on the 11th of June, 1847, and much of the work of several subsequent expeditions consisted in tracing his course.

Americans, Germans and Scandinavians then took the lead for some years, and the belief in an "open polar sea" became general. In 1871, Captain Hall sailed from New York in the Polar, but not till several other expeditions had been organized and carried out.

At last the fact was conclusively proved that there is a northern limit to human occupation.

Continuing he said no matter whether a man has been a Democrat or not, the advocates of the People's party are in favor of free coinage of silver, and will never vote for Mr. Cleveland, in view of his position on that question.

Speaking of Cleveland as a possible nominee, Gen. Rice said that if the Democrats nominated him the People's party will carry the Northwestern states, as well as Arkansas, Georgia, South Carolina and Tennessee. "Some of the Southern Democrats will laugh at this assertion, but they will not laugh at the masses.
